

PATENT

Atty Docket No.: 200207237-1

App. Ser. No.: 10/733,434

IN THE DETAILED DESCRIPTION:*Please amend paragraph 0027 as follows:*

[0027] Reference is made to Figure 3, which illustrates a method of buying a media file from the DRM server. The trusted system connects to the Internet via the network interface and uses the P2P application or a client server application to identify the server having the media file, and. The insecure media player sends its unique identifier N_j to the server, as well as a request to purchase the media file (310).
